New Combi-Cam Ultra Combination Cabinet Lock **Offers Master Key Override & Code Retrievable Function**

Seattle, WA – FJM Security Products is proud to announce the Combi-Cam Ultra – the first combination cabinet lock with master key override and code retrievable capabilities.

The Combi-Cam Ultra, combination cabinet lock, has 10,000 possible combinations available and master key access, allowing for dual access with both keys and combinations. The innovative design offers combination capabilities with innovative code retrieval function with the new combination cabinet lock. Combi-Cam Ultra, made of heavy duty die cast metal, offers higher security, pick resistant keyways, with over 50,000 possible key codes. The combination cabinet lock can be installed vertically and horizontally and is ideal for locker applications, cabinets, drawers, storage, etc - anywhere that needs the flexibility of combination retrieval or multiple person access. Combination cabinet lock comes with easy-to-use knob with distinct, user-friendly open and close indicators, and no housing to rotate which can deface surface. The master key allows users to override the current combination, and retrieve the current combination. The combination cabinet lock fits a maximum material thickness of 1-1/8" and retrofits any standard cam lock. The Combi-Cam Ultra comes in three cylinder lengths (5/8", 7/8", and 1-1/8").

FJM Security Products (www.fjmsecurity.com) is the manufacturer of numerous innovative security products such as the Combi-Cam Cabinet Locks, Padlockable Cam Locks, Combi-Ratchet Combination Ratchet Locks, Combi-Bolt Combination Bolt Locks, SOBO High Security Padlocks, ShurLok and KeyGuard Key Storage, HitchSafe, and other keyed cabinet locks. FJM Security Products, a division of Frank J. Martin, has been in business since 1957.
