

SETTING YOUR

PERSONAL COMBINATION

Your new resettable combination padlock is preset at 0-0-0-0, even though dials may be positioned at other numbers.

To change the preset 0-0-0-0 combination:

STEP 1

Leave the dials at preset combination 0-0-0-0 and pull out the shackle.

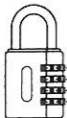

STEP 2

Turn the shackle counterclockwise to 90° and press all the way.

STEP 3

Keep pressing the shackle and set the dials to your own desired combination. (Do not let go of the shackle while setting the dials.)

STEP 4

Release the shackle and allow it to return to its original position. Your personal combination is now set.

Keep your combination in a safe and accessible place for future reference.
