Press Release

New Combi-Cam E RFID Electronic Cabinet Lock

Seattle, WA, October 10th, 2016: FJM Security Products is proud to announce an addition to the Combi-Cam E-Series electronic cabinet locks - the RFID Combi-Cam electronic locker lock has the same very popular features such as 10 year battery life, master/manager code, one-time-use functionality and compact size!

The RFID lock can be programmed to either accept numerical input or RFID cards. With manager/master code functionality and higher reliability, the E-Series RFID locks for lockers offers both surface and semi-flush mounting – perfect for lockers, mailboxes, or cabinet doors. The E-Series RFID cabinet lock simply retrofits any standard cam lock with 3/4" diameter. The RFID locker locks have an attractive, ergonomic design, perfect for metal and wood lockers, cabinets, healthcare use, fitness centers, etc. The RFID door locks are ideal for locker applications, cabinets, drawers, storage, etc - anywhere that needs the reliability of RFID as well as flexibility of multiple RFID cards per lock and multiple RFID locks per card. The RFID lock can be switched back and forth from RFID card access to numerical code access.

- Electronic RFID lock offering high reliability
- Compact size
- Think green - world's only up to 10 year battery life.
No frequent battery changes!
- Operate with RFID card or password (user, service & master)
- Can convert to one-time-use (locker mode) RFID locker lock
- Flexibility
 - One user card per lock
 - Multiple cards per lock (locker mode)
 - Master card & optional service card
 - One card per multiple locks
 - Option to use numerical rather than RFID

FJM Security Products' (www.fjmsecurity.com) mission is to supply resettable combination security devices and other quality hardware products in a manner that exceeds our customers' expectations for value, service and innovation.
