SPSA60

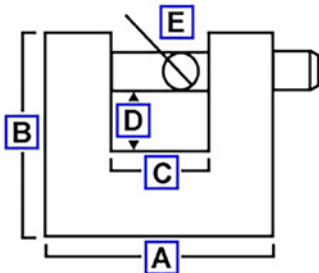

HIGH SECURITY D-STYLE 60MM PADLOCK

FEATURES

- Keying - available keyed alike or keyed different.
- Bolt cutters or saws can't get between the shackle (top U shape) and the padlock body. The hardened steel shackle rotates freely, giving no grip for tools.
- SPSA60 - 60mm padlock body is 60mm (2-3/8") wide, excluding the shackle grip.
- Shackle is constructed out of durable hardened steel, and triple chrome-plated, making it perfect for outdoor and marine environments. Solid brass body.
- Pick resistant, jimmy proof padlock style
- Use for garage doors, shipping containers, sheds, lockers, gates, warehouses, trailer tongues, bikes, storage units, RV/Marine compartments, chests, security boxes, Tonneau Covers, vending machines, gun safes, liquor cabinets. Great for remote locations where limited supervision requires higher security.
- Can be horizontally or vertically.
- 4 unique European-style keys can only be removed from the padlock when it is in the locked position, ensuring padlock is not left unlocked.
- No one else has a key to your lock, adding another layer of security.
- When purchasing multiple locks, you can have them keyed alike (KA) so they all use the same key, or keyed differently.
- Includes 4 keys per lock.
- D Shape padlocks are called SOBO Padlocks in Europe.
- FJM Security has two (2) D Shape Padlocks with different widths: 60mm and 80mm. See the measurements and schematic diagram to find the right one to secure your valuables.
